

FOREIGN COOPERATION IN A PRIMARY SCHOOL

Primary School no 4 in Ciechanów cooperated with the school in Greece. The project has received the National Quality label. Students have made new friends easily and they are willing to learn a foreign language.

Our school has participated in the eTwinning project for the first time. We have joined the project on February 2014. The school project coordinator was an English teacher Mrs. Joanna Trzcńska. Our 11-year-old students from fifth classes cooperated with their peers from the town Krokos in Greece. Children prepared descriptions of their city and their interests, which are placed on the program's Twin Space and our school website.

The most important objective of the project was to encourage students to use information technology and English language skills in practice. We have observed that the students who have involved in the project are getting better grades of English language. We hope that we will be able to realize a next project and inform you about our new results. For more information you can visit our school website: <http://www.sp4.nets.pl/stronag.htm>
